# PREFACE

The National Aeronautics and Space Act of 1958 tasks the National Aeronautics and Space Administration to "provide for the widest practicable and appropriate dissemination of information concerning its activities and the results thereof." To fulfill the Space Act mandate, NASA established a system of acquisition, processing, publication, announcement, dissemination, and exchange. Its purpose was to promote the highest R&D quality and productivity and to minimize R&D duplication. The embodiment of this system is the NASA Scientific and Technical Information (STI) Program. The STI Program is administered by the Scientific and Technical Information Division.

At the heart of the STI Program is a vast wealth of aerospace information. Over three million documents have been put on record in the NASA STI database. The subject coverage of the collection reflects NASA's mission.

Computerized searches of this database are possible through use of NASA/RECON, the forerunner of many major online bibliographic search systems. The NASA Thesaurus is the key to the subject matter of the three million documents.

Three major organizations are responsible for providing information to be included in the NASA STI database; the NASA Scientific and Technical Information Facility, the American Institute of Aeronautics and Astronautics, and the European Space Agency. The European Space Agency acts as a doorway to European aerospace literature and plays a vital role in acquisitions.

The American Institute of Aeronautics and Astronautics (AIAA) acquires periodicals (including government-sponsored journals) and books, meeting papers, and conference proceedings issued by professional societies and academic organizations, and translations of journals and journal articles. In addition to adding this material into the database, AIAA publishes *International Aerospace Abstracts (IAA)* twice a month.

The NASA Scientific and Technical Information Facility acquires NASA authored, NASA contractor, and NASA grantee reports; reports issued by government agencies, domestic and foreign institutions, universities, and private firms; translations; NASA-owned patents and patent applications; and dissertations and theses emphasizing aeronautics, space, and supporting disciplines. In addition to updating the database, the facility prepares a variety of announcement and abstract journals, including *Scientific and Technical Aerospace Reports (STAR)*. Both *IAA* and *STAR* publications use the NASA Thesaurus vocabulary for indexing.

In addition to its abstract and announcement services, the STI Division is responsible for Special Publications, Conference Publications, Reference Publications, and other report series. The STI Division promotes public access by contributing to the Federal Depository Library Program; at least one copy of every NASA publication, including the NASA Thesaurus, is available in either microfiche or printed form at 50 libraries throughout the United States. NASA publications are also available for sale by the Superintendent of Documents, U.S. Government Printing Office, or by the National Technical Information Service.

The Aerospace Database, a consolidation of *IAA* and *STAR*, is available for public use within the United States through commercial database vendors. The Aerospace Database uses the NASA Thesaurus for its controlled vocabulary.

# INTRODUCTION

The *NASA Thesaurus* contains the authorized subject terms by which the documents in the NASA scientific and technical information database are indexed and retrieved. The *NASA Thesaurus* comprises three volumes: Volume 1 - Hierarchical Listing, Volume 2 - Access Vocabulary, and Volume 3 - Definitions.

The *Hierarchical Listing* contains all subject terms and USE cross references currently approved for use. The *Listing* includes terms appearing in the *NASA Thesaurus, Preliminary Edition* (December 1967), the *NASA Thesaurus Alphabetical Update* (September 1971), the *NASA Thesaurus 1982 Edition*, the *NASA Thesaurus 1985 Edition*, and other terms approved for use through March 1988. The *Listing* contains postable and nonpostable terms. Over 17,000 terms and nearly 4,000 USE references comprise the *Hierarchical Listing* which includes over 165,000 broader, narrower and related term entries.

The *Access Vocabulary* is a ready reference tool which provides thousands of additional 'access points' to the *Thesaurus* terminology. It contains the postable terms and nonpostable terms found in the *Hierarchical Listing* along with pseudoterms, embedded terms, and other entry terms. It is a useful companion to the *Hierarchical Listing* and its use is encouraged. The *Access Vocabulary* contains almost 42,000 entries.

*Definitions* defines most of the terms added to the *Thesaurus* since 1976 and many of the earlier terms. It can be consulted as an authority for uppercase/lowercase versions of *Thesaurus* terms. Over 3,200 definitions are complimented by nearly 1,000 use references.

The *NASA Thesaurus* is updated by the *NASA Thesaurus Supplement* until a new edition is issued. The *NASA Thesaurus Supplement* is cumulative and is published semiannually in January and July. It includes complete hierarchies for all new terms, the *Access Vocabulary*, and *Definitions* added since the last edition. A listing of deletions and changes is also included. Suggestions for term modification, deletion, and addition should be addressed to: Lexicographer, NASA Scientific and Technical Information Facility, P.O. Box 8757, BWI Airport, Maryland 21240.

The terminology of the *NASA Thesaurus* is based in large part on the actual indexing vocabulary developed by NASA during the sixties. Other thesauri, notably the DOD *Thesaurus of Engineering and Scientific Terms*, (AD-672000), have provided additional candidate terms. The general guidelines in creating and maintaining the *NASA Thesaurus* have been based on the COSATI *Guidelines for the Development of Information Retrieval Thesauri* (1 September 1967).

This edition of the *NASA Thesaurus* has undergone extensive revision. Array term hierarchies have been revised and expanded.

## NOMENCLATURE AND CONVENTIONS

The nomenclature and conventions employed in the *NASA Thesaurus* follow.

**Postable Terms.** Subject terms that have been approved for use in indexing and thus, can be 'posted'.

**Nonpostable terms.** Terms that are included for cross reference information and cannot be used for indexing.

**Term Selection.** Subject terms have been chosen on the basis of their significance and use in aerospace literature and their effectiveness in incorporating productive retrieval concepts. Particular consideration has been given to frequency of use in earlier NASA indexing and search vocabularies, to relationships with other terms in the vocabulary, and to precise scientific and technical usage.

**Noun Usage.** In general, subject terms are presented in the noun form.

**Singular vs. Plural.** The plural form has in general been used for subject terms. The singular form, however, is occasionally employed for specific processes, properties, conditions, and hardware.

**Term Length.** No more than 42 characters, including spaces, are used for any subject term. Various words in longer terms are often truncated. With this edition scope notes are used to spell out truncated terms.

**Term Ambiguity.** When subject terms have more than one meaning in aerospace usage, or where distinction between terms must be made, clarification is provided in one of two ways:

- a) Parenthetical qualifying expressions or glosses are added, becoming part of the subject term. For example:

SIZING (SHAPING)  
SIZING (SURFACE TREATMENT)

- b) Parenthetical scope notes are also added for explanation or definition; they do not become part of the subject term. For example:

**SPECTROSCOPIC ANALYSIS**  
SN (FOR SPECTROSCOPIC TOOLS IN CHEMICAL ANALYSIS)

**Direct Entry.** Subject terms that consist of more than one word are listed for direct entry, i.e., in their natural word order rather than in the inverted form. Inverted forms appear in the *Access Vocabulary*. For example:

**ANALYTICAL CHEMISTRY not CHEMISTRY, ANALYTICAL**

**Abbreviations and Acronyms.** Some abbreviations and acronyms that are in common use in the aerospace community are employed in this *Thesaurus*. In most cases USE cross references are made from the unabbreviated forms. For example:

**ORBITING SOLAR OBSERVATORY**  
USE OSO

**Synonyms.** When candidate subject terms are true synonyms, one is chosen to be the valid, or postable term, and the other is provided with a USE cross reference. For example:

**COLUMBIUM**  
USE NIOBIUM

**NIOBIUM**  
UF COLUMBIUM

**Array Terms.** Subject terms with meaning either too broad or ambiguous for effective indexing or retrieval of information, have been designated array terms and carry the following scope note: (USE OF A MORE SPECIFIC TERM IS RECOMMENDED — CONSULT THE TERMS LISTED BELOW). Relationships with other postable terms are shown by the Related Term (RT) reference only. For example:

**BEAMS**  
SN (USE OF A MORE SPECIFIC TERM IS RECOMMENDED —  
CONSULT THE TERMS LISTED BELOW)  
RT BEAMS (RADIATION)  
BEAMS (SUPPORTS)

An infinity symbol,( $\infty$ ) precedes an array term in each of its appearances in Volume 1.

**Identifiers.** In the *NASA Thesaurus* identifiers, i.e., subject terms that include a numeric or alphabetic designation, or both for a specific model or item, are treated as regular terms and are provided complete cross references. For example:

**F-111 AIRCRAFT**  
UF LASV  
TFX AIRCRAFT  
GS ATTACK AIRCRAFT  
• FIGHTER AIRCRAFT  
• • **F-111 AIRCRAFT**  
GENERAL DYNAMICS AIRCRAFT  
• **F-111 AIRCRAFT**  
GRUMMAN AIRCRAFT  
• **F-111 AIRCRAFT**  
JET AIRCRAFT  
• TURBOFAN AIRCRAFT  
• • **F-111 AIRCRAFT**  
SUPERSONIC AIRCRAFT  
• **F-111 AIRCRAFT**  
RT  $\infty$  AIRCRAFT  
MISSION ADAPTIVE WINGS  
VARIABLE SWEEP WINGS

## CROSS REFERENCE STRUCTURE

Cross reference relationships in the *Hierarchical Listing* are shown as follows:

<i>Cross References</i>	<i>Notation</i>
Broader Term .....	GS
Narrower Term .....	GS
Related Term .....	RT
Use .....	USE
Used For .....	UF

These cross references have the following applications:

**Broader Term.** This reference indicates that the term represents more inclusive concepts. In the Generic Structure (GS), the Broader Terms appear above and to the left of the term referenced. For example:

```
REENTRY COMMUNICATION
GS TELECOMMUNICATION
  • SPACE COMMUNICATION
  • SPACECRAFT COMMUNICATION
  • REENTRY COMMUNICATION
```

TELECOMMUNICATION, SPACE COMMUNICATION and SPACECRAFT COMMUNICATION are Broader Terms to REENTRY COMMUNICATION.

**Narrower Term.** This reference indicates that the term represents more specific concepts. In the Generic Structure (GS), the Narrower Terms appear below and to the right (indented) of the term referenced. For example:

```
GS SCANNERS
  • COASTAL ZONE COLOR SCANNER
  • HORIZON SCANNERS
  • INFRARED SCANNERS
  • OCEAN COLOR SCANNER
  • OPTICAL SCANNERS
  • FLYING SPOT SCANNERS
  • MULTISPECTRAL BAND SCANNERS
  • THEMATIC MAPPERS (LANDSAT)
  • ULTRASONIC SCANNERS
```

COASTAL ZONE COLOR SCANNER, HORIZON SCANNERS, INFRARED SCANNERS, OCEAN COLOR SCANNERS, and OPTICAL SCANNERS are narrower terms to SCANNERS. FLYING SPOT SCANNERS, MULTISPECTRAL BAND SCANNERS, and THEMATIC MAPPERS (LANDSAT) are narrower to both OPTICAL SCANNERS and SCANNERS.

The number of narrower terms is not limited. For example, ARTIFICIAL SATELLITES has nearly 500 narrower terms.

**Related Term (RT).** This reference indicates that the two terms are closely related conceptually but are not structured within the broader or narrower 'tree', or hierarchy. The reciprocal of the RT reference 'a' is the RT reference 'b' and vice versa.

(a) RADAR EQUIPMENT	(b) RADIO EQUIPMENT
RT RADIO EQUIPMENT	RT RADAR EQUIPMENT

**Use (USE).** This reference indicates that the term is not 'postable', i.e., not a valid term, and that the following term or terms should be used instead. For example:

```
STS
USE SPACE TRANSPORTATION SYSTEM
```

**Used For (UF).** This is a reciprocal of the USE cross reference and identifies valid, or 'postable' terms. For example:

```
SPACE TRANSPORTATION SYSTEM
UF STS
```

## **ALPHABETIZATION**

The ordering of subject terms into an alphabetical arrangement can be accomplished in several ways. The most commonly used methods are the letter-by-letter, word-by-word, and the computer sorting order. In the absence of any universal agreement on a standardized approach, a word-oriented modification of the computer sorting technique has been adopted in this *Thesaurus* as the most useful and economic for this purpose.

Nonalphabetic characters are filed either at the beginning of the alphabet, at the end of the alphabet or are ignored altogether. Thus parens are filed before the alphabet in Volume 1. Parens are ignored for filing in Volume 2 due to permuting. Hypens, slashes and periods follow blank spaces.

## **PREVIOUS EDITIONS**

NASA Thesaurus; Subject Terms for Indexing Scientific and Technical Information. Preliminary Edition, 1967. NASA SP-7030. 3 Vols., Vol. 1. Alphabetical Listing, A-L; Vol. 2. Alphabetical Listing, M-Z; Vol. 3. Appendixes.

NASA Thesaurus Alphabetical Update. 1971, NASA SP-7040.

NASA Thesaurus 1976 Edition, NASA SP-7050. 2 Vols. Vol. 1, Alphabetical Listing; Vol. 2, Access Vocabulary.

NASA Thesaurus. 1982 Edition, NASA SP-7051. 2 Vols. Vol. 1, Hierarchical Listing; Vol. 2, Access Vocabulary.

NASA Thesaurus. 1985 Edition, NASA SP-7053. 2 Vols. Vol. 1, Hierarchical Listing; Vol. 2, Access Vocabulary.
